

# Lifeline

## Thousand Foot Krutch

Cut me like those words you throw  
Console me when you want control  
Roll me in those lies you've told  
But I won't play these games no more and (Don't run and hide, stand up and fight)  
I'm feeling like just letting go  
(It's shaking your mind with cause and divide)  
It's taking everything I know  
(Don't run and hide, stand up inside)  
The wheels keep burning  
I'm about ready to blow When I get angry, I feel weak  
And hear these voices in my head  
Telling me to fall beneath  
Cause they'll make everything okay  
How did I get here?  
Everything's unclear  
I never meant to cause you pain  
Give me a reason I can believe in  
I need it all this time  
Send me a lifeline Wave if it makes you look good  
Smile when you feel like you should  
It's hard not to treat this like I could  
Heaven help me, it's overwhelming (Don't run and hide, stand up and fight)  
I'm feeling like just letting go  
(It's shaking your mind with cause and divide)  
It's taking everything I know  
(Don't run and hide, stand up inside)  
The wheels keep burning  
I'm about ready to blow When I get angry, I feel weak  
And hear these voices in my head  
Telling me to fall beneath  
Cause they'll make everything okay  
How did I get here?  
Everything's unclear  
I never meant to cause you pain  
Give me a reason I can believe in  
I need it all this time  
Send me a lifeline When I get angry, I feel weak  
And hear these voices in my head  
Telling me to fall beneath

Cause they'll make everything okay  
How did I get here?  
Everything's unclear  
I never meant to cause you pain  
Give me a reason I can believe in  
I need it all this time  
Send me a lifeline  
When I get angry, I feel weak  
And hear these voices in my head  
Telling me to fall beneath  
Cause they'll make everything okay  
How did I get here?  
Everything's unclear  
I never meant to cause you pain  
Give me a reason I can believe in  
I need it all this time  
Send me a lifeline
