

Miserable

Helmet

Someone's got it in for me
He's trying to get to you
You think he knows what you need
But not a word he says is true When it's time to move in
He is creeping 'round
You think he respects you
But he'll just drag you down I can make you miserable
I have been that low
If I can make you miserable
Just let me know Someone's got it in for me
I don't care any more
I've learned to enjoy the petty things
Like settling a score I can make you miserable
I have been that low
If I can make you miserable
Just let me know Let me know
Honey, let me know Just let me know
