

Killing Circus

Circadian Skizm

Hostile age
Nefarious, this maze
Predetermined fate or just a game?
Life is the killing circusHow long
Can this go on?
Is there any exit from this cage?
Life is the killing circusGrand design
Master mind
Precious time
Endless lineIcy feud
Impersonal and crude
Intelligent design or sadistic rage?
Life is the killing circusHow few
Recognize the truth?
In the book of time we are not a page
Life is the killing circusInescapable eternal random and cold
Mysteries unanswered ages old
Nothing to be done only await
Witness time unraveling your fateFear not stand firm
Hold on and learn
What brings your pain
It is your brainTune out
Lest you drown
You are not equipped to understand
Life is the killing circusYour time
Survive
Never chase illusions in the sand
Life is the killing circus
