

# The Process Of Suffocation

## Pestilence

Smoke's penetrating the atmosphere  
It comes forth from heavy industry  
The layers of air surrounding us  
Are venomed by large factory chimneys  
Environment pollution  
Damage unmeasurable  
Nitrogen concentration  
Drive away the oxygen  
Choking in the gas we self produced  
The death of mother earth I introduce  
Chemical rain drips from the sky  
The more we breathe, the sooner we die  
Climates change, oceans vaporize  
Woods becomes desert, no vegetation  
Species of animals exterminated  
The earth makes its last rotation  
The process of suffocation  
Coming genocide  
Bio-circle is disturbed  
Humanity's suicide  
Why give a child its birth?  
We are poisoning our earth  
The heritage of this generation  
Is a planet threatened with destruction
