

Theme from Snuff Box (feat. Geno Washington)

[Matt Berry](#)

I can't be in love if it's plastic
To live on my own just seems tragic
But we'll raise our swords high when our day comes
You thought it was gold but it was bronze So get here in time when our day comes
You thought it was gold but it was bronze
Get here in time when our day comes
You thought it was gold but it was bronze So I guess it's goodbye now, it's over
Nothing much changed, we're just older
But if I see you again back in detox
Put my remains in my snuff box
So get here in time when our day comes
You thought it was gold but it was bronze
Get here in time when our day comes
You thought it was gold but it was bronze Well it's not long now till it's over
Nothing much changed, we're just older
But if I see you again back in detox
Put my remains in my snuff box
So get here in time when our day comes
You thought it was gold but it was bronze
Get here in time when our day comes
You thought it was gold but it was bronze
