Original Song

Underworld

When I'm alone I try to remember
All of the things I want
I get depressed but don't give me handouts
Everyone loves a trierI would love to be lucky as you
In with the rich survivors
Wouldn't complain if I was a rich man
Everyone can, canAnd you want it
And you need it
And you love itWe sing the original song, gimme more
We sing the original song, gimme more
We sing the original song, gimme more
We sing, please give it to me, give it to meWhen I'm alone I talk to myself
And don't get the wrong impression
Don't have the cash but I got the pride
I never lay down and dieI see the pictures I know the adverts
Everyone else got lucky
I got the bad deal looking around me
Everyone can, canYou want it
You need it
You love itWe sing the original song, gimme more
We sing the original song, gimme more
We sing the original song, gimme more
We sing, please give it to me, give it to meWe sing the original song, gimme more
We sing the original song, gimme more
We sing the original song, gimme more
We sing, please give it to me, give it to meWe sing the original song, gimme more
We sing the original song, gimme more
We sing the original song, gimme more
We sing, please give it to me, give it to meWe sing the original song, gimme more
We sing the original song, gimme more
We sing the original song, gimme more
We sing, please give it to me, give it to meWe sing the original song, gimme more
We sing the original song, gimme more
We sing the original song, gimme more
We sing, please give it to me, give it to meWe sing the original song
