## **Original Song**

## **Underworld**

When I'm alone I try to remember
All of the things I want

I get depressed but don't give me handouts

Everyone loves a trierI would love to be lucky as you

In with the rich survivors

Wouldn't complain if I was a rich man

Everyone can, canAnd you want it

And you need it

And you love itWe sing the original song, gimme more

We sing the original song, gimme more

We sing the original song, gimme more

We sing, please give it to me, give it to meWhen I'm alone I talk to myself

And don't get the wrong impression

Don't have the cash but I got the pride

I never lay down and dieI see the pictures I know the adverts

Everyone else got lucky

I got the bad deal looking around me

Everyone can, can You want it

You need it

You love itWe sing the original song, gimme more

We sing the original song, gimme more

We sing the original song, gimme more

We sing, please give it to me, give it to meWe sing the original song, gimme more

We sing the original song, gimme more

We sing the original song, gimme more

We sing, please give it to me, give it to meWe sing the original song, gimme more

We sing the original song, gimme more

We sing the original song, gimme more

We sing, please give it to me, give it to meWe sing the original song, gimme more

We sing the original song, gimme more

We sing the original song, gimme more

We sing, please give it to me, give it to meWe sing the original song, gimme more

We sing the original song, gimme more

We sing the original song, gimme more

We sing, please give it to me, give it to meWe sing the original song
