

# Between Stars

## Underworld

I drive too fast  
Under a full moon  
Save the best to last  
Under a full moon And pray you don't crash  
Under a full moon  
When the head's too far out of whack  
Step back, step back Step back, step back  
Step back, step back  
Step back, step back  
Step back, step back And the hope of the world  
Rides with one man  
Everybody crying  
On the telephone ringing We hold our breath  
We spin around the world  
You and me cling  
To the outside of the earth  
Under a full moon  
Under a full moon I got you on my brain again, again  
And I hear your voice  
On a northbound bus  
Chinatown to Chinatown And the hope of the world  
Rides with one man  
Everybody crying  
On the telephone ringing We hold our breath  
We spin around the world  
You and me cling  
To the outside of the earth  
Under a full moon Will you hold my camera?  
Will you press release?  
Will you capture me?  
As the lights go down And the hope of the world  
Rides with one man  
Everybody crying  
On the telephone ringing We hold our breath  
We spin around the world  
You and me cling  
To the outside of the earth  
Under a full moon Step back, step back  
Step back, step back

Step back, step back  
Step back, step back Don't wait for me, I'm always late  
It's in my blood, in the stone  
I feel the world go round  
I feel the world go round
