Im Stuck

Mest

here's a little story about my life
I was a normal kid livin' it right
and I don't really know just what it was
but now I know I'm fucked up just becauseI better not take another sip
or this time it might be it
I may never see another day
I better not take another sip
or this time it might be it
I may have my life tooken awayI lost myself a day ago
where I was I don't know
tomorrow I may find again the place that I've always been
in the darkness all alone that's the place that I always go
you'll always find me hiding there
smokin' a J and drinkin' a beerI better not take another sip
or this time it might be it
I may never see another day
I better not take another sip
or this time it might be it
I may have my life tooken away(lets go)where I'm headed I don't really care
just as long as there all there
cause I know one day my life will be tooken away
and that day might be todayI better not take another sip
or this time it might be it
I may never see another day
I better not take another sip
or this time it might be it
I may have my life tooken away
I may have my life tooken away
I may have my life tooken away
I may have my life tooken away
and that day might be today
