

Never Forget

The Word Alive

And now we're all finding out
How hard it is to lose
Someone you never thought you'd live without
Where have you gone? We'll never get the chance
To let you know how we felt
To let you know what you meant
And all the things you lived for The show must go on
The show must go on They'll never be another one like you
We'll never forget
Moving on, we know that we have to
You left behind a mourning world Now all your love, they sing your songs (they sing your songs)
It's in memories, that you'll live on Your life wasn't wasn't in vain
But without you here, nothing's the same Now I have the chance
To tell them what (what they mean)
What I feel
I can't leave these words unsaid (words unsaid)
What they mean, what I feel
I won't leave these words unsaid They'll never be another one like you (like you)
We'll never forget
Moving on, we know that we have to
You left behind a mourning world Now all your love, they sing your songs (they sing your songs)
It's in memories, that you'll live on I keep replaying everything you said to me
The stage is everything, these songs mean everything
I keep rewinding the painful memory
The day you left us will always haunt me They'll never be another one like you (like you)
We'll never forget
Moving on, we know that we have to
You left behind a mourning world Now all your love, they sing your songs (they sing your songs)
It's in memories, that you'll live on You'll live on (You'll live on)
You'll live on (You'll live on) They'll never be another one like you
We'll never forget
