

Fuck Everything

Suicide Silence

If you hate the world around you
And you hate everything that you see
And if what you see makes you
happy
Then fuck off 'cause we're all out of time
So follow me
Life is short, I'll make it what's
worth
With time well spent, time spent so well
So don't run away, just face the new day
Without a single
fear in mind
Just take it one day at a time
And fuck everything, everything
Fuck everything, everything!
If you hate the world
And it makes you sick what you see
Then follow me
Life is short, I'll make it
what's worth
With time well spent, time spent so well
So don't run away, just face the new day
Without a
single fear in mind
Just take it one day at a time
And fuck everything, everything
Fuck everything,
everything!
Welcome to a nightmare
This is the place we all call home
Welcome to a nightmare
This is
the place we hate to call home
We fucking hate
Hate
Hate
Hate
If you hate the world and you hate
what you see
Then say this with me; fuck everything (x6)
Put your fingers in the fucking air
And live your
life without a care
If you hate the world and you hate what you see
Then say this with me; fuck everything
(x2)
If you hate the world (fuck everything)
And it makes you sick what you see
Fuck everything
Say
this with me
Fuck everything (x22)
