Take Care! (G2 f135Mix)

[Funker Vogt](#)

We are living in a nightmare
We call it normal life
The time is reached that we take care
And stop dancing on the knifeCrowded cities, polluted air
Every day is getting worse
Try to breathe the smoky steam
It will affect your lungsAs long as I live it will be fine
There's nothing what I can do
The world will die and so do I
So why should I take careBurning oil-fields in Iraq
A dark cloud darkens the sun
But this happens so far away
So why should I take careAs long as I live it will be fine
There's nothing what I can do
The world will die and so do I
So why should I take careWhy should I take careThe ozone-layer is destroyed
Deadly sun rays hit the earth
The world turns from green to gray
All that remains is dustAs long as I live it will be fine
There's nothing what I can do
The world will die and so do I
So why should I take careWhy should I take careWe are living in a nightmare
We call it normal life
The time is reached that we take care
And stop dancing on the knife
