In My Eyes

Milk Inc.

In my eyes you'll see the way it used to be
Take a look and see the light still shines in me
In my eyes you'll see the way it used to be
Take a look and see the light still shines in meThere's a part of me that I forgot to be
Take a look and see the light still shines in meTake a look and see the light still shines in me
Take a look and see the light still shines in me
In my eyes, in my eyesIn your arms, it seems you've taken all my dreams
Take a look and see the light still shines in meThere's a part of me that I forgot to be
Take a look and see the light still shines in meIn my eyes, in my eyes, the light still shines in me
The light still shines in me, in my eyes, in my eyesTake a look and see the light still shines in me
Take a look and see the light still shines in me
In my eyes, in my eyesTake a look and see the light still shines in me
Take a look and see the light still shines in me
In my eyes you'll see the way it used to be
Take a look and see the light still shines in me
