2nd Law

Tom McRae

Tell all my friends I have gone to the moon
Tell all my friends I will write them soon
And tell them if you see them that I am better left alone'Cause I'm living up here where the air is thin
Where gravity don't bring you down
I'm living up here and I'm watching your universe cooling downI spend my days beneath a perspex dome
I think that I have finally come home
So tell them if you see them that I am better left alone'Cause I'm living up here where the air is thin
And where gravity don't bring you down
I'm living up here and I'm watching your universe cooling down
