Little Blue One

Cowboy Mouth

When I woke up I heard a voice
And I froze in my bed
When I woke up I was divorced
How did you get back into my head
No no no it was the radio
You're gone and I don't even think of you
My little blue one
I don't even think of you my little blue oneI was sleeping and had a dream
I was writing to you
It was creepy in my dreamy dream
You read my letter remembered I loved you
No no no I don't love you any more
You're gone and I don't even think of you
My little blue one
I don't even think of you my little blue oneI don't even think of you reading your paper each morning
I don't even think of you sipping your coffee and yawning
I don't even think of your hands pulling hair back
Off your pretty face
Don't even think of you walking away
As I'm walking around this empty placeI remember and tried to forget
With a bottle of wine
I remember and try to forget
That the ring your not wearing is mine
No no no you don't wear it any more
You're gone and I don't even think of you
My little blue one
I don't even think of you my little blue one
I don't even think of you my little blue one
I don't even think of you my little blue one
My little blue one
