Panic

Name Taken

so now you hear what took you years to listen for
but still i can't make out the words
its the message that makes you miserable
but still...burning alive from the inside
burning down
sleep now you've fallen out of facepanic at the disco
sat back and took it so slow
are you nervous? are you shaking?
save compliments to praise complation
we don't have to feel we fit in
we can move back
we can leave themburning alive from the inside
burning down
sleep now you've fallen for memanufactured dreams and a fabricated resolution
how can we move ahead from this backward motion?so now you will hear what took you years to listen for
but still can't feel itburning alive from the inside
burning down
sleep now you've fallen out of faceburning alive from the inside
burning down
sleep now you've fallen for memanufactured dreams and a fabricated resolution
how can we move ahead from this backward motion?
panic panic
panic panic
