

# How You Remember It

## Blues Traveler

So I thought about my lifetime  
How the days, they are confused  
As the moments, they do roll by  
Only some will follow you  
They're the same every day  
Think about what we do  
If you take the time to look well  
Any one of them could chase you  
That's how you remember it  
It'll find you soon  
That's how you remember it  
What will be the truth  
From out behind the shadows  
Every moment I have known  
Like catching that first firefly  
In a jar when I was back home  
Summer rain on a windowpane  
The way she looked that night  
And every second after

Going to radiate the light  
That's how you remember it  
It'll find you soon  
That's how you remember it  
What will be the truth  
Looking at my photograph  
Staring back 20 years ago  
The man I am, the boy I was  
The things I still don't know  
No matter how you remember it  
It'll find you soon  
No matter how you remember it  
That will be the truth  
No matter how you remember it  
It'll find you soon  
No matter how you remember it  
That will be the truth
