# No Cops

## Night Beats

too much to lean to much to say
i cannot explain what they're meaning to say
its in your blood better wait your turn
its another mean bullet who don't wanna learn
i don't wanna have this moment with you
got nothing better then find a stash or two
even the cops gonna give me a hard time
aint gun lose my cool, i just gotta find a good linetoo many seasons in your heart it seems
you look for shells before you fire on the scene
another body on the curb downtown
too scared to even smile when the piper comes in townits a harder bit o'motion
harder bit of chance
give me two reasons why i shouldn't give a damn
I don't even know what you wanted to find
give a big middle finger then i turn out the light no notwo bucks good, another up short
i can really tell that you want that divorce
theres another reason for, 'nother reason stand
put the cap away and give your hand
