

Inferno (Unleash The Fire)

Symphony X

Welcome to the Anarchy
Enigmatic entity
The grand illusion destitution
Infecting one and all
Forces they're oppressing me
Lords of mediocrity
An iron will shall break the steel
Some will rise and some will fall Oh yes, we ride
Through stormy skies
Of fire Evil lies that mesmerize
From the dragon's tongue they slide
A fury lashes from the ashes
Never losing sight
Pounding down the wicked ones
Tyrants now are overcome
A final yell from hounds of Hell
Rising we unite Oh yes we ride
Through stormy skies The endless nights
In the moonlight, we together
We curse uncertainty and false desires
We lift the mask
And stand together one and all
And when the flames grow dim,
Look within Unleash the fire... A time will come when all will see
In the end - its just a game
Time will tell when all these things that have come to pass
Still remain The endless nights
In the moonlight, we together
We curse uncertainty and false desires
We lift the mask
and stand together one and all
And when the flames grow dim,
Look within Unleash the Fire...
