

Twilight of the Gods

Helloween

Insania 2 O 4

We've thrown away our former Gods controlling our day
We have created better ones so we control the way
We are the ones with the power to hold down the enemy
Our Gods are perfection and they are protecting our lives
We still need some more of them to be safe from the other side
As long as we're stronger nothing will happen to us
Fire flash in the night, just an evil dream
Holy war in the sky, never
Insania 2 O 16
Error in store 1 O 3, we watch the sun at night
The pretty Gods we've built ourselves now terminate our lives
Silicone brain powered voices are crying attack tonight
Our Gods are now fighting in anger, burning our world
The doomsday has come and there is no place to hide away
The future is over and there is no turning back
Fire flash in the night, now reality
Holy war in the sky
Twilight of the Gods, insania's dead and gone
Another world was born but the twilight soon will come
Fire flash in the night, now reality
Holy war in the sky
Twilight of the Gods, insania's dead and gone
Another world was born but the twilight soon will come
