Decimate

Rotten Sound

We are heading back to the Stone Age
We are doomed to be savedThings will become more simple
Through survival instincts
When the globe becomes overloaded
And the South is enslavedIs there anything worth saving
As the cycles will take us back here again?
Cycles of insanity are cleaning up this globe
Through the decimation of this arrogant race in chargeFive thousand years from now
We'll see this again
The cycles of stupidity
The repeated historyBack to the Stone Age
We are doomed to be savedThings will become more simple
Through survival instincts
When the globe becomes overloaded
And the South is exploitedFive thousand years from now
We'll see this again
The cycles of insanity
The repeated historyWe are the cancer of this globe
The precious planet Earth is now polluted
Raped and molested by the retarded human race
That destroys it piece by piece
