Galaxy

Paperwhite

Can we last forever?
Can we even try?
Grab my hand it's so steady.
We are leaving here tonight.All at once, we found each other.
Piece by piece, we built another world,
Out of something small.
One by one, the stars collided,
Two and two, we both unite.
It's ours.
Take me far away,
To our galaxy.
Come, come, come away with me,
To our galaxy.Now we wait for darkness,
My eyes fixed on the door.
Time moves slower than ever,
But my heart can't be ignored.All at once, we found each other.
Piece by piece, we built another world,
Out of something small.
One by one, the stars collided.
Two and two, we both unite.
It's ours.
Take me far away,
To our galaxy.
Come, come, come away with me,
To our galaxy.
Come, come, come away with me,
To our galaxy.
Come, come, come away with me,
To our galaxy.Stay here a minute longer.
I see the sky is calling.
We'll start racing toward the sun.
Don't say it's now or never.
I think we found forever.
We'll start racing toward the sun.And our galaxy.
Come, come, come away with me,
To our galaxy.
Come, come, come away with me,
To our galaxy.
Come, come, come away with me,

To our galaxy.Come, come, come away with me,
Come, come, come away with me,
Come, come, come away with me,
To our galaxy.
