

Got It Good

Jem

If I had one wish, if I had one wish
It would be to be free of this fighting all around
'Cause it's so wrong and it could be so right
In my heart I know we're here to grow
To love, to give, to learn, to live
And I believe in miracles, open up your eyes
Got a soul, got a mind, got a heart that beats in time
You've got a smile, got a voice, got the gift of love
You've got it good, don't forget how lucky you are
Darling, darling, use it to connect with everyone
Don't you know we're golden covered up with mud?
One day you'll see the truth that we all share the same blood
Supposed to love thy neighbor together we should stand
Whatever color, race or creed, come on and hold my hand
'Cause I don't differentiate, we're all the same to me
Got a soul, got a mind, got a heart that beats in time
You've got a smile, got a voice, got the gift of love
You've got it good, don't forget how lucky you are
Darling, darling, use it to connect with everyone
And it's getting so serious, crushed my heart in pieces
But I know I'm not alone in wanting peace, not alone
And if you feel what I feel raise your hands with me
Got a soul, got a mind, got a heart that beats in time
You've got a smile, got a voice, got the gift of love
You've got it good, don't forget how lucky you are
Darling, darling, use it to connect with everyone
Got a soul, got a mind, got a heart that beats in time
You've got a smile, got a voice, got the gift of love
You've got it good, don't forget how lucky you are
Darling, darling, thank you for the moments that we had
