

We Are Not Only What We've Been Before

The Moth & The Flame

I went to my room to pray for us
Open our minds to what we needI came down the stairs to see you there
The shape that your mouth makes
Tells me there's nothing wrong
With how we live our livesTell me there's nothing wrong
With how we live our lives
Tell me there's nothing wrong
With how we live...We are not only what we've been before
We are not only what we've been before
We are not only what we've been before
We are not only what we've been beforeWe are not only what we've been before
We are not only what we've been before
You are not only what you've been before
We are not only what we've been beforeWe are not only what
We are not only what
We are not only what we've been beforeTell me there's nothing wrong
With how we live our lives
