Save Ourselves

Chimaira

What a shame, breaking down
What is getting the best of you?
Take a breath, it's not complex
I'm going to put your mind at easeInnocent people are not meant to suffer
We're making negative energy power
This will be our truthCan you feel us? Can you feel us?
Can you feel us? Can you feel us?
Can you feel us? We're stronger
We pray on the weak and conquer
No longer care for those
Who try to condemn and oppose
We'll save ourselvesYou're afraid that I'm right
I know it eats you up inside
Well listen to me and you will see
You have to let those fears fly freeThe only danger in the world is to be
Weak-minded with insecurities
This won't be our truthCan you feel us? Can you feel us?
Can you feel us? Can you feel us?
Can you feel us? We're stronger
We pray on the weak and conquer
No longer care for those
Who try to condemn and oppose
We'll save ourselvesWhy, why, why do you fear everyone of us?
Why, why, why do you hate everyone of us?
You crush us, you crush us, you crush us
Why, why, why do you feel we are wasting our time?Go away, end this now
You need to get down off this cloud
Start focusing and listening
And feel it's the time to change thingsWhen I'm alone I don't feel hopeless at all
The day must come where we can stand tall
And this will be our truthCan you feel us? Can you feel us?
Can you feel us? Can you feel us?
Can you feel us? We're stronger
We pray on the weak and conquer
No longer care for those
Who try to condemn and oppose
We'll save ourselves, save ourselvesCan you feel? We'll save ourselves
