

Catch 23

GBH

You beat us down when we came back
The revenge is sweet and we're on the attack
Who are you, what do you do? You promised us the world then took it away
Slogging 'round the country for a tenner a day
But we got wise to your idle lies The missing rung and we all knew
But we survived catch 23
Now we're prepared and that's the key
So we'll survive catch 23 Organization, a word you've never heard
The checks you wrote which never cleared
Your big ideas, our biggest fears You're representatives of your name
You'll be forgotten as quickly as you came
Now you're gone, we'll carry on The missing rung and we all knew
But we survived catch 23
Now we're prepared and that's the key
We'll survive catch 23 They beat us down when we came back
The revenge is sweet and we're on the attack
Who are you, what do you do? You promised us the world then took it away
Slogging 'round the country for a tenner a day
But we got wise to your idle lies The missing rung and we all knew
But we survived catch 23
Now we're prepared and that's the key
We'll survive catch 23 We'll survive catch 23
We'll survive catch 23
We'll survive catch 23
Yeah, we'll survive catch 23
