

# You Were the One

[Diana Ross](#)

Yes, I believe in fairy tales  
And all my favorites come true  
The handsome prince rides in  
And he sweeps me of my feet  
And then it turns out to be you  
Baby, I am the romantic kind  
But you're the hero in my eyes I knew when you walked into the room  
You were the one, you were the one  
You are bringing me the sun and the moon  
You were the one, you were the one Though I don't think that it was just by chance  
You must have felt it like I did  
It was enchantment with just one glance  
A fantasy we both can live  
Into the sunset you and me  
Just like an old harlequin movie scene I knew when you walked into the room  
You were the one, you were the one  
You are bringing me the sun and the moon  
You were the one, you were the one I knew when you walked into the room  
You were the one, you were the one  
You are bringing me the sun and the moon  
You were the one  
It was you, yeah  
It was you  
It was you I knew when you walked into the room  
It was you  
You are bringing me the sun and the moon  
It was you, yeah; you were the one  
You are bringing me the sun and the moon  
You are the one, you are the one  
I knew when you walked into the room  
You were the one, you were the one  
You are bringing me the sun and the moon  
You were the one, you were the one
