

# Dark Magic

## Astorian Stigmata

This is the song that saved my life  
This is the song that plays inside my head  
When I'm trying to block you out

Cause the truth it cannot die  
It can only be buried alive  
And it's ghost always finds its way back out  
To haunt you when you think of me

But the voice inside my soul says:  
Set me free - Just set me free  
And the voice inside my head says:  
Just let it go  
And the voice inside my heart says:  
You've gone too far - Your on the own

These are the words I really mean  
This is the face you never seen  
And somewhere between  
The thought and your words  
The truth it escapes

But the voice inside my soul says:  
Set me free - Just set me free  
And the voice inside my head says:  
Just let it go  
And the voice inside my heart says:  
You've gone too far - Your on the own

This is the song that saved my life  
This is the song that plays inside my head  
When I'm trying to block you out

But the voice inside my soul says:  
Set me free - Just set me free  
And the voice inside my head says:  
Just let it go  
And the voice inside my heart says:  
You've gone too far - Your on the own

And the voice inside my head says  
"Don't just die"
