I Could Drive Forever

Smog

To many lines has been broken
To many people have crumbled apart
In my handI should have left a long time ago
The best idea I've ever hadWith every mile
Another piece of me peels off
And whips down the road
All down the roadI should have left a long time ago
The best idea I've ever hadWith every mile
A piece of me peels of
And whips down the road
All down the roadI should have left a long time ago
The best idea I've ever hadI feel light and strong
I could drive foreverTo many lines has been broken
To many people have crumbled apart
In my handI should've left a long time ago
The best idea I've ever hadWith every mile
Another piece of me peels of
And whips down the road
All down the roadI should've left a long time ago
The best idea I've ever hadI feel light and strong
I could drive forever
