

I Could Drive Forever

Smog

To many lines has been broken
To many people have crumbled apart
In my hand I should have left a long time ago
The best idea I've ever had With every mile
Another piece of me peels off
And whips down the road
All down the road I should have left a long time ago
The best idea I've ever had With every mile
A piece of me peels of
And whips down the road
All down the road I should have left a long time ago
The best idea I've ever had I feel light and strong
I could drive forever To many lines has been broken
To many people have crumbled apart
In my hand I should've left a long time ago
The best idea I've ever had With every mile
Another piece of me peels of
And whips down the road
All down the road I should've left a long time ago
The best idea I've ever had I feel light and strong
I could drive forever
