One Side

The Swedes

One side of the story
Your side of the story
One side of the story
Your side of the storyUh, tell your mother, it's alright
Tell your sisters and brothers, it's okay
Your friends are on the way, tell 'em calm down
'Cause they don't even know, we going to work this out'Cause that's how it starts, right there
Telling everybody 'round here
What's going on between us
We can't let 'em all in here'Cause everybody ain't for us
'Specially me when they only hearOne side of the story
And that's your side of the story
Then they make up their own story
I wonder what would happen?If they only heard my story
That I love you only
Baby, can't you see?
They don't know about you and meI got an idea we should get away
Somewhere with a view of the ocean for a couple days
All night girl, we could make break up to make up love
And clear our minds, nobody there but usAnd if the phone rings, let it ring
If there's a knock at the door, let' em knock
If it's the end of the world, let it end
At least I'll be with my girl'Cause everybody ain't for us
'Specially me when they only hearOne side of the story
And that's your side of the story
Then they make up their own story
I wonder what would happen?If they only heard my story
That I love you only
Baby, can't you see?
They don't know about you and meWhen they see ya cryt they don't know I'm hurt
When they feel your pain they don't know I"m worse off
But I hold it in 'til I see you again
'Cause I don't wanna answer to nobody but youOne side of the story
Your side of the story
One side of the storyThey only hear one side of the story
And that's your side of the story
Then they make up their own story
I wonder what would happen?If they only heard my story
That I love you only

Baby, can't you see?
They don't know about you and meThey don't know what we know?
One side of the story and that's your side of the story
They don't know what we know
One side of the story and that's my side of the story
