

# Future Man, Future Lady (feat. Laurie Berkner)

## Ziggy Marley

Future man knows what to do, he's got a plan to help this land  
He's the future man, he's the future man  
Future lady's confident, she knows how to take a stand  
She's the future lady, she's the future ladyBright in the yellow sun, there's energy for everyone  
Bright in the yellow sun, let it come, let it come  
Bright in the yellow sun, there's energy for everyone  
Bright in the yellow sun, let it come, let it comeFuture man is taking steps, he ain't got no time to rest  
He's the future man, the future man  
Future lady's getting dressed, she's gonna clear up all this mess  
She's the future lady, the future ladyThe wind makes the windmill turn  
The wind makes the world go round and round  
The wind makes the windmill turn, let it blow, let it blowThe wind makes the windmill turn  
The wind makes the world go round and round  
The wind makes the windmill turn, let it blow, let it blowFuture man knows what to do, he's got a plan to help  
this land  
He's the future man, the future man  
Future lady's confident, she knows how to take a stand  
She's the future lady, she's the future ladyBright in the yellow sun, there's energy for everyone  
Bright in the yellow sun, let it come, let it come  
Bright in the yellow sun, there's energy for everyone  
Bright in the yellow sun, let it come, let it comeThe wind makes the windmill turn  
The wind makes the world go round and round  
The wind makes the windmill turn, let it blow, let it blowThe wind makes the windmill turn  
Wind makes the world go round and round  
Wind makes the windmill turn, let it blow, let it blow
