

Breakout

Bee Gees

It don't matter who you are
Anyone can be a star
Brighter than the lightning
You go as far as you go
You got to be what you know There may be somebody out
To get the better of you
You need the one good woman
To keep you alive Don't let the pressure
Beat a hole in your head
Remember nobody left you
On the railway line
And if the one shoe fits
You got a chance this time Breakout
Ain't no one gonna break your heart
You'll never do it if you never start
You be there, breakout now There's gonna be a story told
And baby, no one gonna steal your soul
You be there If you believe in tomorrow
And you wait all night
You've got it all
And then you're lost in flight There are diamonds in the street
But you don't get enough to eat
Walking on a wire
There is a future unknown
Nobody does it alone And maybe you can be the thunder
If you follow your dream
There must be one good woman
To show you the way
Don't let them make you feel
Less than you are Remember somebody called you
On the telephone line
And all the world gets crazy
And you win this time Breakout
Ain't no one gonna break your heart
You'll never do it if you never start
You be there, breakout now Breakout
There's gonna be a story told
And baby, no one gonna steal your soul
You be there If you believe it tomorrow

When you wait all night
You got it all
And then you're lost in flight Breakout now
[Incomprehensible]
You'll never do it if you never start
You be there, breakout now She can make you understand what love is
From the moment you discovered it
And baby, no one's gonna steal your soul
You be there
If you believe in tomorrow
And you wait all night Breakout now
Ain't no one gonna break your heart
You'll never do it if you never start
You be there
Do you believe in tomorrow
And you wait all night?
