

I Want My Baby Back

Edwin Starr

Tossing and turning the whole night long

My girl is gone, can't take it

Trying to conceal the loneliness I feel

But it's real, can't fake it

Listen to me

This pain in my heart is tearing me apart

A memory, I can't shake it

I try to tell myself to find somebody else

But my heart won't make it[Chorus]

I need love, that's a natural fact

And more than anything

I want my baby back

I want her right here with me let me tell you now

She's the only girl that can brighten up my world

What can I say to make her do it?

She's fine as can be and so good to me

I had a good thing, but I blew it, now I'm all alone

The love we had is gone

What can I do to renew it?

If I only had a chance to continue our romance

I wouldn't hesitate to get to it[Chorus]Come on, come and see about me[Chorus]I ain't seen her no where

I been searching everywhere

I, I want my baby back

Give anything in this world

To get back that girl

I tell you, I need her

Need her, need her

Need her right now, ah yeah
