

# Simple Things

## All

father left home when you turned 14. took the best, left the rest for the simple things. the simple things come easy when youve been used. tried every drug in the neighborhood. but nothing can change your mind about the simple things. the simple things come easy when youve been abused. life is cheap, money's free, these are what we call the simple things, desperate now, gun to your mouth, is death worse than life when you live for the simple things? the simple things come easy when youve no choice, it smells outside from the atomic tide, and you have no money and nowhere to hide. the simple things come easy when youve no voice. the simple things come easy, when the good things in life arent free. i will try to protect you from within myself. let the simple things run their course. i cant trust my family and friends. its all around, they all want the simple things. the simple things come easy, if you believe. i'll draw my lines, choose my defense. when it all comes down theyll kill for the simple things. the simple things come easy if you concede.
