Us

Thad Jones

Late last night I was looking through pictures
Flooded with memories I lied on the floor
Than spread them around me like friends at a party
There faces remind me of all that I've known
Still I can't forget all the hush who it was all the fiction and lies
And the tears and the laughs take a walk through the past
You and I hand in hand
As we looked at this thing called us
Late last night I was pacing the hallway
Reading the letters you'd signed X and O
I turned out the lights in the and imagined you with me
I tried my hardest to cry but it just wouldn't come
Still I can't forget all the hush who it was all the fiction and lies
All the tears and the laughs take a walk through the past
You and I hand in hand
As we look at this thing called us
All the hush who it was all the fiction and lies
All the tears and the laughs take a walk through the past
You and I hand in hand
As we look at this thing called trust
Still I can't forget all the hush who it was all the fiction and lies
All the tears and the laughs take a walk through the past
You and I hand in hand
As we look at this thing called us
All the hush who it was all the fiction and lies
All the tears and the laughs take a walk through the past
You and I hand in hand
As we look at this thing called trust
