

# When We Were Humans

## S.P.O.C.K

I am one of the latest models  
got a number but no name  
In the room there are many others  
we're machinery without memoriesBut suddenly a disturbance  
And I remember the time  
When we were humans  
We weren't connected to one big mind  
When we were humans  
everybody was one of a kind  
We're covering section by section  
assimilating everyone  
Bringing them closer to perfection  
Biological, technologicalBut suddenly a disturbance  
And I remember the time  
When we were humans  
We weren't connected to one big mind  
When we were humans  
everybody was one of a kind
