Rollercoaster

Framing Hanley

The cold reality of this
Is the safety bar just slipped
But still we held on
While the panic settled inYou've got your demons
You've got your daggers
I've got a feeling
It doesn't matter (It doesn't matter)
We both know how this goesUp and down again
Like a rollercoaster
I would love to show you
Not all hope is lostI can see where you call the end
Over and over
Cause the best part of me
Is when you get offI sold my soul to write this rhyme
In a frantic state of mind
Took you for granted
Left you on the sidelines
I'm not a saint
You're not either
You're the pain
You're the fever (you're the fever)
We both know how this goesUp and down again
Like a rollercoaster
I would love to show you
Not all hope is lostI can see where you call the end
Over and over
Cause the best part of me
Is when you get offIt's not what we pictured
Not what we planned
There weren't no exceptions
So lets start it overI can't protect you
If you're jumping ship
But we were perfection
Lets start all over againLets start all over againUp and down again
Like a rollercoaster
I would love to show you
Not all hope is lostI can see where you call the end
Over and over
Cause the best part of me

Is when you get offYou're the best part of me
