

Beam Me Up (Kill-Mode)

Cazzette

Tonight we'll run away
Speeding faster than a midnight train
Somewhere to such a place
Where the stars come out to light your face
We'll leave behind a world in darkness
Go where no one's broken hearted
Take off without a trace
Neon angels, up, up and awayDiamond clouds
I think we're getting closer
Don't stop now
Off the ground
Higher than a supernova
Don't look down
Don't look down
Don't look down
Don't look downBeam me up
Beam me up
Beam me up
Beam me upDiamond clouds
I think we're getting closer
Don't stop now
Off the ground
Higher than a supernova
Don't look down
Don't look downAfter we kissed the sun
We can burn our names into the sky
Feel my electric touch
Taste my supersonic lullabyDiamond clouds
I think we're getting closer
Don't stop now
Off the ground
Higher than a supernova
Don't look down
Don't look down
Don't look down
Don't look downBeam me up
Beam me up
Beam me up
Beam me upDiamond clouds

I think we're getting closer
Don't stop now
Off the ground
Higher than a supernova
Don't look down
Don't look downDon't look down
