

Change It All

Goapele

They're closing all the schools down
Some teachers work for free now
And libraries won't be found
'Cause there's not enough
Can you see a change in your town
Small business close it's [Incomprehensible]
I'm trying to sort it out
What we're giving up
Basically there are people left out
From living comfortably can we figure it out
I've been waiting restlessly for the words to a song
That could change it all, change it all, change it all
I never found a 9 to 5
That was worth it from my soul 'til I
I pursued what brought joy in my life
And there's something for us all
And I still think it is my right
And it's the last and one of few
To get the luxury for learning
Something I could use
Ohh, basically there are people left out
From living comfortably can we figure it out
I've been waiting restlessly for the words to a song
That could change it all, change it all, change it all
(If the words could change it all)
(Change it all)
So many laws are changing
They say it's the price for war
We send over, he spend billions
It's hard to believe that years ago people died to fight
But history feels so far away
We're not fighting for our lives anymore
It's hard to know what's really worth fighting for
Or is it killing and dying on the streets
Ohh, basically there are people left out
From living comfortably can we figure it out
I've been waiting restlessly for the words to a song
That could change it all
Ohh, basically there's enough for us all
So why can't we somehow figure it out
I've been waiting restlessly for the words to a song
That could change it all, change it all, change it all
(If the words could change it all)
Change it all, change it all
If a song could change it all
What if we could change it all
