

# Burning Saints

## Indecision

Where is the center of the world?  
arrogance is ignorance, arrogance is blinding  
Empires are temporary - every government is temporary  
no standard prevails - nothing lasts forever  
your assimilation is at hand  
shield your eyes from the sun and kneel and pray  
waiting for the destruction of the new roman empire  
waiting for the end of televised war and plastic culture  
reaching across the world and spreading like a fucking cancer  
Amputate it, sterilize it and start all over
