

# That's Just Me

Billy Currington

Prefer the fiddle to the violin  
And I tend to think that supermodels are too thin  
And I think who you are is who you oughtta be  
But that's just meThe best of Andy Griffith was in black and white  
Fishin' still beats workin' if you never get a bite  
And coffee's kinda pointless without caffeine  
But that's just me[Chorus]  
And I believe in little that I hear and only half of what I see  
And I believe that living by the book is harder than it used to be  
And I'm convinced that lovin' you  
Is gonna be the secret to my longevity  
But that's just meI've never seen a place that I like more than home  
When I go to the movies, I don't take a telephone  
And I'll buy the gas, but you oughta get the air for free  
But that's just meI've never been to Mars, but I'm a man  
And I accept the fact that women are just hard to understand  
I think people take themselves too seriously  
But that's just me[Chorus]Hey, that's just me  
That's just me
