Light The Sun

Seeed

Light the sun
Light the sunYou are sounding the space
Navigating your base
You know what to select
Sail on your soundtrackDon't get lost in the maze
Let's go on face to face
All o you gotta check
We are all in one packIt's too dark nowadays
But don't burn the whole place
You know bullets arr wack
There is no need to attackCome on follow our trace
We know some better ways
We are bringing the light back
Before you break your neckMove on up and
Light the sun, baby,
Light the sun
Light the sun
Light the sunNow daylight's back go out and
Check
Man you can choose good or bad
News
Acting your act that is your trouth
Get in the mood now make a moveHere's what you use, older than age
Stronger than youth it cuts you loose
Make sure you're ok don't get confused
You're on your track you've got the clueMove on up and
Light the sun, baby,
Light the sun
Light the sun
Light the sunWhen it snows in your heart
Things seem to fall apart
Fix it dance the sundanceWatch your soul reach out
And it touch our crowd
Go on dance the sundanceYou got power you're smart
And you know how to start
So you dance the sundanceGetting rid of your doubt
'Cause your doubt's just a could
And you dance the sundanceMove on up and
Light the sun, baby,

Light the sun
Light the sun
Light the sun
