

# Bodies

## Sivu

We're this mad  
in our bodies  
We find cures  
For what our hearts see  
Cause life starts  
your life starts  
as roots call round  
words from your mouth On our backs  
we're just bodies  
we find flaws  
as each of our hearts beat  
we're one part of 2 wholes  
with men's distance laid out for miles You keep begging me to stay  
though we really have to go  
the tide is dragging us away  
the current told me so As I watch the animals walking  
2 by 2  
well who do you think's gonna walk  
with you?  
Cause they're flooding this place  
And starting brand new  
They're cleaning up our mess  
they're taking our pain soon With this men,  
In our bodies  
We find flaws  
In each of our hearts beat  
As one starts  
One starts  
As roots call round  
Words from your mouth With this raft on a sea of bodies  
Define laws with hands and our feet  
As one part of 2 wholes  
With men's distance laid out for miles You keep begging me to stay  
Though we really have to go  
The tide is dragging us away  
The current told me so As I watch the animals walking  
2 by 2  
Well who do you think's gonna walk  
with you?

Cause they're flooding this place  
And starting brand new  
They're cleaning up our mess  
They're taking our pain soon(Ooo ooo ooo ooo ooo ooo ooo) x4I watch the animals walking  
2 by 2  
Who do you think's gonna walk  
with you?  
Cause they're flooding this place  
And starting brand new  
They're cleaning up our mess  
They're taking our pain soon
