

Chemicals Collide

Boys Like Girls

I got a couple addictions
But I swear that I'm coming clean
I got a new way of thinking
Yeah, you're bringing out the best in me

I got a bit of a history
But you're telling me that you don't care
I've been a bit of a mystery
The only thing that I could find around tonight was you
So come on, come on
You want to

Shut your eyes
And feel the chemicals collide
You and I tonight
You're the sugar in my high
Shut your eyes
I feel the chemicals collide
Stars and satellites
Spinnin' round and round
On the night you saved my life

I got a couple of problems
A thousand puzzles runnin' through my head
But I think that you could solve them
You're always just one step ahead

I've had a couple heartbreaks
But you're telling me that it's alright
Cause all the others were mistakes
Yeah, I think this time I finally got it right with you
So come on, come on
You want to

Shut your eyes
And feel the chemicals collide
You and I tonight
You're the sugar in my high
Shut your eyes
I feel the chemicals collide

Stars and satellites
Spinnin' round and round
On the night you saved my life

When the mornin' is breaking
And your heart is shaking
I'll remember how it feels right now
When we're lost in the moment
The sky is exploding
Just keep on floating

Shut your eyes
Feel the chemicals collide
You and I tonight
You're the sugar in my high
Shut your eyes
I feel the chemicals collide
Stars and satellites
Spinnin' round and round tonight

Shut your eyes
I feel the chemicals collide
I feel so alive
Spinnin' round and round
On the night you saved my life
