

Keep It Together

Twin Peaks

Duck down the alley after midnight
Counting your money with your headlights out
Look past the screen door, you can see her keeping
Keeping the party together
She says, I'm your painkiller from the corner
I'll be the ones that's gonna turn you around
And besides, twenty something amounts to nothing
When you're dead in the ground
She's here to set you free
She's got that something that will put you at ease
And you could end up like a dog in the street
But she'll still be here staying with it
Get your head up, get it out your hands
Feeling better was just a part of your plan
Just pay up a couple when you come back again boy
So she can keep it together
Keep it together
