I Understand

Sofia Loell

Take a little time to cool your mind
There's a lot of sadness there
Everybody gets into trouble sometimes
And needs some time aloneMemories aren't always good
They can steal your peace also
But if you need some time alone
I understandI can see tears in your eyes
But you won't cry in front of me
Well, I can't share the pain
That you don't want me to seeLiving is the hardest thing
Still it's worth the doing
And if you need to sort you out
I understandLeave me alone is what your eyes tells me
But I won't just desert you
When you need me [Incomprehensible] mostIf you need to get through this alone
Please don't shut me out
I love you, I understand
I love you, I understandOh, deep inside your eyes
I see the child that you once were
Tell me please what keeps the key
To your so hard tied up soulBaby, let me help you
Let me please come close to you
And if you need to sort you out
I understandLeave me alone is what your eyes tells me
But I won't just desert you
When you need me [Incomprehensible] mostIf you need to get through this alone
Please don't shut me out
I love you, I understand
I love you, I understandLove you and understand
Love you and understand
Love you and understand
Love you and understandI love you, I understand
I love you, I understand
I understandI love you, love you
I love you and understandLove you and understand
Love you and understand
Love you and understand
Love you and understand
