

You Won't Forget About Me

Dannii Minogue

You won't forget about me
You won't forget about me Our first and last summer together
We shared the passion till the end
I found a friend, I will remember
I'll never feel the same again, now that's its over Living the dream
I'm breathing in deep
Let it go, now that it's over
It's good to know, yeah, it's good to know that You won't forget about me
As long as you live, as long as you live
You won't forget about me
I promise you this as long you live You won't forget about me
As long as you live, as long as you live
You won't forget about me
I promise you this as long you live You won't forget about me I hear the music
Over and over
The memories play on and on
On and on I'm living this dream
I'm breathing in deep
Then I hear you say as you drift away
That it's good to know, it's good to know that You won't forget about me
As long as you live, as long as you live
You won't forget about me
I promise you this as long you live You won't forget about me
As long as you live, as long as you live
You won't forget about me
I promise you this as long you live You won't forget about me You won't forget about me
As long as you live
You won't forget about me
I promise you this as long you live As long you live, as long you live
As long you live, as long you live
As long you live, as long you live
As long you live, as long you live I'm living the dream
When I'm breathing in deep
Want it all on repeat
Play it on and on 'cause it's good to know that You won't forget about me
As long as you live, as long as you live
You won't forget about me
I promise you this as long you live You won't forget about me
As long as you live, as long as you live

You won't forget about me
I promise you this as long you live You won't forget about me You won't forget about me
You won't forget about me You won't forget about me
As long as you live, as long as you live
You won't forget about me
