

Impossible Heart

Paloma Faith

I fall in love too easily
I know my heart doesn't think
It just don't care for me
And I know I drop it way too fast
Into a swimming-pool I splash
I don't come up for air until I'm drowned
And I stop breathing in When will I ever learn instead?
I just crash and burn
I don't stop and think before
I let myself go God damned impossible heart
Won't save me
I can't change it
My oldest enemy
An impossible love's my favorite
I can't take it
There's nothing left to give
My impossible heart will kill me
Before it cures me
And I can't stop the pain
Oh your impossible love's contagious
And I can't shake it
You make me go insane Oh baby now, I thought I'd learned from my past mistakes
It seems your touch did its work
It's time to admit
And I know it just won't go away
'Cause you got your claws that's sunk in me
I can't control myself, I'm stuck
'Til my heart's bleeding in When will I ever learn instead?
I just crash and burn
I don't stop and think before
I let myself go God damned impossible heart
Won't save me
I can't change it
My oldest enemy
An impossible love's my favorite
I can't take it
There's nothing left to give
My impossible heart will kill me
Before it cures me

And I can't stop the pain
Oh your impossible love's contagious
And I can't shake it
You make me go insane So if the sea separates us
Time is against us
Or you're unavailable
Or if you don't like girls
Just boys with the curve
Then I probably want you
I probably need you Just call out my name
I know I hold your hand
God damned impossible heart
Won't save me
I can't change it
My oldest enemy
An impossible love's my favorite
I can't take it
There's nothing left to give
My impossible heart will kill me
Before it cures me
And I can't stop the pain
Oh your impossible love's contagious
And I can't shake it
You make me go insane God damned impossible heart
Won't save me
I can't change it
My oldest enemy
An impossible love's my favorite
I can't take it
There's nothing left to give
My impossible heart will kill me
Before it cures me
And I can't stop the pain
Oh your impossible love's contagious
And I can't shake it
You make me go insane
You make me go insane
