

# Cave Bear

## Wyoming

a thousand stars, the city lights  
blur into a swarm of fireflies  
intimidated and afraid I crawl back into my cave  
but I will give it another trya thousand cars drive through the night  
like howling hounds ready to fight  
intimidated and afraid I crawl back into my cave  
shall I give it another try?I am looking for somebody  
out there to back me up  
I think they're all gone  
is there anybody  
out there to hold me up?  
I think it's all gonea thousand dreams in the streets  
buried under asphalt beneath our feet  
no matter where I go I feel unsafe  
so I crawl back into my cave  
I won't give it another tryI am looking for somebody  
out there to back me up  
I think they're all gone  
is there anybody  
out there to hold me up?  
I think it's all gonewatch your back  
don't tread on their toes  
keep a low profile  
so I've been told  
so I've been toldwatch your back  
don't tread on their toes  
keep a low profile  
so I've been told  
so I've been toldnow here I sit and wait for all those things to come my way  
I've been waiting for so long  
I sit and wait for all those things to come my way  
I've been waiting for so long  
waiting for so long  
I'm still waitingI was looking for somebody  
out there to back me up  
I think they're all gone  
I couldn't spot anybody  
I feel my time is up  
and now it's all gone
